

3DS MAX WITH VRAY SYLLABUS

OBJECTIVE: The Objective of the training session is to learn about the Modelling , Material Applying , lighting and Rendering Technique using 3ds max and Vray and become proficient in the Application in such a way to attain the user level certification from Autodesk. The Training consists of the tools and commands involving Information Modeling and lighting Technique in a more efficient manner.

Duration:		
S.NO	CONTENT	HOURS (L/P)
1	INTRODUCTION	
	User Interface Study	
	Rendering Engine & Interface Setup	
	Viewport configuration	
	Docking of Floating Tool bars	
	Navigation Panel	
	View/Visual Style	
2	Model	
	Standard Primitives	
	Extended Primitives	
	Compound Objects	
3	Modify Commands / Tab	
	Object Selection	
	Snap Setup	
	Move an object	
	Rotating an object	
	Scaling an Object	
	Cloning System	
4	Modifier	
	Length, Width, Height & Polygon segment	
	High poly Model	
	Shell, FFD, Edit Poly, Lattice, Mesh smooth, Turbo Smooth	
	Edit Poly	
5	Vertex, Edge, Border, Polygon & Element	
	Project Work - Modeling	
	Stair Model	
	Residential Project	
	Commercial Project	
	Interior of a Room	
6	Product Modeling	
	Camera	
	Vray Physical Camera	
	Focal Length	
	Safe Frame	
7	Perspective Angle	
	Lighting	
	Vray Light	
	Type, Multiplier, Mode, Temperature	
	Positioning	
	Control Options	
	Size and directional	

8	Materials	
	Diffuse	
	Reflect	
	Refract	
	Texture	
	Bitmaps	
9	Rendering Engine Setup	
	Rendering Engine (CPU vs GPU)	
	Draft Setup	
	Final Setup	
	Settings to Export for Post productions	
10	Projects	
	Product Modeling	
	Exterior View of a Multistory Building	
	Interior of a Room	
	Residential / Commercial Work
