

ANGULAR JS SYLLABUS

OBJECTIVE: The Objective of the training Session is to impart Knowledge on Dynamic Web apps. In order to Learn Angular JS, He/She should have a basic knowledge om HTML, CSS, Java Script.

Duration		
S.No	CONTENT	Hours (L/P)
1	Understand the basics of AngularJS and its role in web development.	
	Develop skills to build dynamic web applications using AngularJS.	
	Learn to use various AngularJS features and components effectively.	
	Gain a foundation for further study in modern JavaScript frameworks and libraries.	
	Introduction to AngularJS	
	Course Overview	
	Introduction to AngularJS (What is AngularJS? History and Features)	
	Setting Up the Development Environment (Node.js, npm, Angular CLI)	
	Creating Your First AngularJS Application	
	Understanding the Structure of an AngularJS Application	
2	AngularJS Basics	
	AngularJS Directives	
	Data Binding in AngularJS	
	AngularJS Expressions	
	AngularJS Controllers	
3	Modules and Dependency Injection	
	Understanding AngularJS Modules	
	Creating and Using AngularJS Modules	
	Dependency Injection in AngularJS	
	Services and Factories	
4	Routing and Navigation	
	Understanding AngularJS Routing	
	Configuring Routes with ngRoute	
	Creating Single Page Applications (SPAs)	
	Route Parameters	
5	Directives in Depth	
	Understanding Directives	
	Built-in AngularJS Directives (ngIf, ngFor, ngClass, ngStyle)	
	Creating Custom Directives	
	Directive Scope and Controller	
6	Forms and Validation	
	Working with Forms in AngularJS	
	Two-way Data Binding with ngModel	
	Form Validation Techniques	
	Custom Validation Directives	
7	Services and HTTP Communication	
	Introduction to AngularJS Services	
	Making HTTP Requests with \$http	
	Using \$resource for RESTful Services	

	Handling Promises with \$q	
	Interceptors for HTTP Requests and Responses	
8	Filters and Pipes	
	Understanding AngularJS Filters	
	Using Built-in Filters (currency, date, filter, json)	
	Creating Custom Filters	
	Using Filters in Controllers and Services	
	Performance Considerations with Filters	
9	AngularJS Animations	
	Introduction to AngularJS Animations	
	Using ngAnimate Module	
	Animating Views and Elements	
	CSS3 Transitions and Keyframes	
	JavaScript-based Animations	
10	Testing AngularJS Applications	
	Introduction to Testing in AngularJS	
	Unit Testing with Jasmine and Karma	
	End-to-End Testing with Protractor	
	Writing Testable Code in AngularJS	
	Mocking Dependencies and Services
