

C PROGRAMMING		
OBJECTIVE: The Objective of the training session is to learn about the Basics of Programming. C is mostly written to code an Operating System. C is one of the most famous programming languages and is the forefather of C++, one of the most widely used programming languages today. This session is to impart the knowledge C Programming in order to become an expert in Basic Computer Language		
Duration:		
S.No	Content	Duration
1	Introduction to Programming	
	Course Overview	
	History and Features of C	
	Setting Up the Development Environment	
	Writing and Running Your First C Program	
2	Basic Syntax and Structure	
	Variables and Data Types	
	Basic Input and Output	
	Operators (Arithmetic, Relational, Logical)	
	Simple Programs	
3	Control Structures	
	Conditional Statements (if, if-else, nested if)	
	Switch Case	
	Loops (for, while, do-while)	
4	Functions	
	Function Basics	
	Function Prototypes and Definitions	
	Parameter Passing (by value and by reference)	
	Recursion	
5	Arrays and Strings	
	One-dimensional Arrays	
	Multi-dimensional Arrays	
	String Handling Functions	
	Array and String Manipulation	
6	Pointers	
	Introduction to Pointers	
	Pointer Arithmetic	
	Pointers and Arrays	
	Pointers to Functions	
7	Structures and Unions	
	Defining and Using Structures	
	Array of Structures	
	Pointers to Structures	
	Unions	
8	File Input and Output	
	File Handling Basics	
	Reading from and Writing to Files	
	File Operations (open, close, read, write)
