

HARDWARE & NETWORKING SYLLABUS		
OBJECTIVE: The objective of this session is to impart knowledge about the fundamentals of a computer hardware and its Operating system to the students. The training consists of various elements of Detailed Parts for the better understanding to be a solution provider		
Duration:		
S.NO	CONTENT	HOURS (L/P)
1	Computer Fundamentals & Basics of Power System in a computer	
	Parts of Computer System	
	Components Over View	
	System Case , Branded and Assembled	
2	Introduction to SMPS & UPS	
	Trouble shoot	
	Switch mode Power supply	
3	Introduction to Input output system	
	BIOS	
	CMOS	
4	Details about Central Processing Unit & Main board	
	Installing a Processor in a mother board	
	Compatibility	
	Form Factor	
	Bus	
	Manufacturer (ASUS)	
5	Primary and Secondary Memory	
	Difference between RAM & ROM	
	Types of RAM	
	SSD & HDD	
	SATA & NVME	
	Cloud Storage	
6	Computer Accessories	
	Optical Drive	
	Keyboard & Mouse	
	Monitor	
	Pendrive	
	Printer	
	Camera	
7	Introduction to Operating system	
	Types of OS	
	Difference between OS from Microsoft, Linux and MAC	
	Configuring a bootable Device	
	CD / DVD	
	Flash Drive	
8	Disk Partitioning	
	Storage Space	
	Application Installation Space	
	Storage Space Expansion methods	
9	Computer Management	
	Manage the resource as per User Need	
	Drive Update	
	Mandatory Applications	

10	Virus / Malwares	
	Virus Attack Awareness	
	Course of action to disinfect the system	
11	Data Communication and Networking	
	LAN, CAN, MAN, WAN	
12	Knowledge of Network Topologies, Networking Devices, Transmission Media , Sharing of resources	
	Topology - Bus, Ring, Mesh , Star	
	Devices - Switch, Router, firewall	
	Cables & connectors - UTP, Fiberoptic	
	Crimping - Straight Through, Cross Over	
13	Knowledge of Internet & Internet Network Configuration	
	IP Address - Type - Class A -E	
	Mac Address	
	Lan Implementation	
	Configure IPV4 address	
	File sharing	
	remote Service	
	OSI Model & TCP/IP Model	
	Monitoring	
	Network Monitoring using Wireshark
