

REVIT SYLLABUS

OBJECTIVE: The Objective of the training session is to learn about the Building Modelling Information & Building Design Management System using Revit Architecture and become proficient in the Revit Application in such a way to attain the user level certification from Autodesk. The Training consists of the tools and commands involving Information Modeling in a more efficient manner. The training also involves LOD 100 - 350

Duration:	48 hours (8Hrs / Day) (6 Days)	
S.NO	CONTENT	HOURS (L/P)
1	Introduction	
	Building Information Modeling	
	Revit Architecture	
	History	
	Features	
	Projects	
	Project Templates	
	Default Project Template	
	Revit File Types	
	Exploring the USER Interface	
	Building Elements	
	Revit Elements and Families	
2	Drawing Aids	
	Project Units	
	Listening and Temporary Dimensions	
	Levels	
	Adding Levels	
	Modifying Levels	
	Level Properties	
	Creating New Level Element Type	
	Constrain Level Lines	
	Remove Level Lines	
	Walls	
	Drawing a plan as per Dimension	
3	Walls	
	Wall Properties	
	Arc Walls	
	Creating a Wall Element Type	
	Compund Structure	
	Vertically Compund Walls	
	Adding Sweeps and Reveals	
	Wall Shapes and Openings	
	Stacked Walls	
	Wall Joins	
	Working with Grids	
4	Editing Commands	
	Move	
	Copy	
	Paste	
	Editing Pasted Elements	

4	Paste Aligned	
	Create Similar	
	Rotate	
	Mirror	
	Array	
	Scale	
	Trim/Extend	
	Offset	
	Align	
	Doors	
	Placing Doors	
	Door Properties	
	Load from Family	
	Windows	
	Placing Windows	
	Window Properties	
	Constraint Doors/Windows	
	Match	
	Visibility Graphics	
	Tape Measure	
5	Components	
	Loading Component	
	Placing Component	
	Modifying Properties	
	Introduction to Modern Medium Library	
	Managing Views	
	Floor plan view	
	Ceiling Plan View	
	Cutting Plan View	
	Plan Region	
	Elevation View	
	Section View	
	3D View	
	Cropping a View	
	Visibility and Graphics Display	
	View Templates	
6	Dimensions	
	Temporary Dimensions	
	Permanent Dimensions	
	Constraints	
	Applying and Removing Constraints	
7	Floors	
	Creating Floors	
	Placing Elements on a Sloped Floor	
	Ceilings	
	Creating Ceilings	
8	Roofs	
	Roof by foot print	
	Join/Unjoin Roofs	

	Roof Ridges	
8	Openings	
	On Face	
	Vertical Opening	
	Shaft Opening	
	Dormer Opening	
	Wall Opening	
9	Curtain Walls	
	Creating Curtain Walls	
	Curtain Grids	
	Mullions	
	Reshaping Curtain Wall Panels	
	Merging Curtain Wall Panels	
	Adding Curtain Door Panel	
	Embedded Walls	
10	Stairs	
	Creating Stairs	
	Stair Calculator	
	Modifying Stairs	
	Stair Properties	
	Ramp	
	Railing	
11	Massing	
	Introduction	
	Creating In-Place Masses Using Forms	
	Extrusion	
	Revolve	
	Sweeps	
	Loft	
	Modifying Forms	
	Adding an Edge to a Form	
	Adding a Profile to a Form	
	Rehosting Forms	
12	Surface Forms	
	Rationalizing Surface	
	Patterning Surface	
	Mass Family	
	Creating Buildign Elements	
	Walls	
	Mass Floors	
	Curtain System	
	Roofs	
13	Text & Tag	
	Callout views	
	Creating Details	
	Inserting aDetail Component	
	Repeating Detail	
	Drafting Views	
	Import from CAD	

	Reference Callouts	
14	Schedules	
	Introduction	
	Creating schedule and Quantities	
	Custom Parameters	
	Modifying Schedules	
	Material Takeoff	
	Exporting Schedule	
15	Rooms	
	Room plans	
	Room Separation Line and Boundaries	
	Room Schedule	
	Areas	
	Area schemes	
	Area Plans	
	Area Boundaries	
	Area Tag	
	Color Schemes	
	Legend Views	
	Keynotes	
16	Structural Modelling	
	Structural Template	
	Structural Component Families	
	Structural Columns	
	Beams	
	Join and Cutback	
	Beam Systems	
	Braces	
	Structural Walls	
	Foundations	
	Structural Floor	
17	Sheet	
	Title Block	
	Adding a sheet	
	Adding View to a Sheet	
	Modifying a Views on a Sheet	
	Creating a Title Sheet	
	Printing	
18	Lights Rendering	
	Wallthrough	
	Solar Studies	
19	Site Design	
	Creating Toposurface	
	Contours	
	Contour line Label	
	Modifying Toposurface	
	Subregion	
	Split	

	Merge	
	Building Pads	
	Graded Regions	
	Parking Components	
	Site Components	
20	Working in a Team	
	Introduction	
	Worksets	
21	Working with Linked Models	
	Linking Revit Models	
	Nested Link	
	Managing Links	
	Shared Positioning	
	Acquiring and Publishing Coordinates	
22	Design Option	
	Project Phasing	
	Exporting	
23	Materials	
	Decal	
	Interference Checking	
	Customizing project Settings	
	Fill patterns	
	Line Style and Line Weights	
	Line Patterns	
	Import / Link	
	Groups	
24	In- Place Families	
	Setting Work Planes	
	Creating and Modifying In- Place Families	
25	Family Creation	
	Introduction	
	Creating a Swing Door Family	
26	Family Creation	
	Creating a Sliding Window Family	
	Creating Arch Window Family	
27	Family Creation	
	Creating a new Furniture Family	
	Staircase Customization	
28	Latest Version Updates	
	User interface Enhancements	
	Graphic Enhancements	
	Updates in Massing	
	Updates in Material	
	Sheet Enhancements	
	Floor Enhancements	
	Sun Path Analysis	
	Background images in Rendering	
29	Panel Updates	
	Family Creation with Adaptive Components	

25	Curtain Panel Pattern 1	
	Curtain Panel pattern 2	
30	Family Updates	
	Family Creation with Adaptive Components	
	Grill Design	
	Net Design	
	Family Editor Enhancements	
	Reporting Parameter
